- ✓ We ship, and drop ship worldwide.
- ✓ Contact us with your inquiries and we will be glad to help.

### Option 1

**"Screw down Option"** (for FlipUp™ frame only) - patent pending  
Screw down option so all 4 edges of frame are tightened down onto insert to prevent theft or wind blow out. Also great for use on moving vehicles since you can use less expensive, thinner inserts, and the insert won't "rattle" inside the frame. Accommodates inserts up to .270" thick. Use security screws, or can use regular screws, your choice.

Screws are hardly visible

### Option 3a

**Blocker™ screw** (for Slide-In™ frame only)  
Super fast insert changes, no frame parts to remove. Blocker screw to prevent theft of insert. This is simply a center mounted security screw (or can be a regular or headless screw) in the slide-in portion of the frame. Blocks the insert from being "slid out."

Wall

### Option 3c

**Removable frame edge**  
(for Slide-In™ frame only)  
Must remove frame edge to load or remove inserts.  
Choices: 2 front mounted security screws (also we can provide regular headed or headless screws that can be opened with common tools)

2 front mounted security screws. Benefits: Easy and fast removal of screws with hand or cordless tools. Great for frequent insert changes

### Display

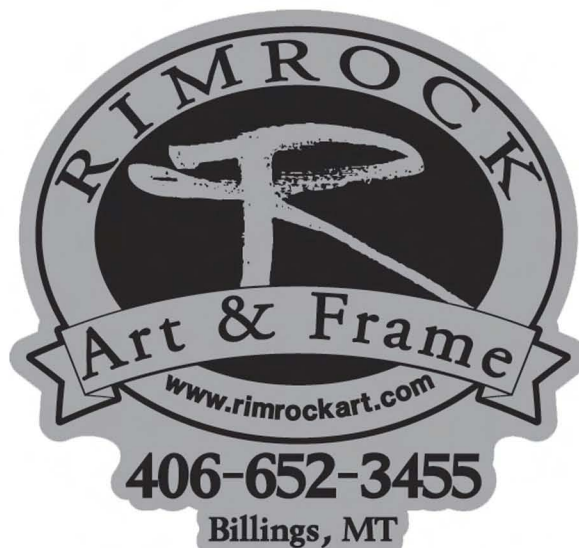

Floorstands any size, frames, height adjustable
